

## 1.5 THE COUNT OF ONE HUNDRED

**Objective:** Count, read and write to 100 in numerals.

### Instructions

1. You need a tub of pebbles, building bricks, small toys or dried pasta, for example, and a set of 0-9 number cards, and finally an empty container
2. Mix the cards up and put them face down in a pile
3. Hop over and pick two cards and hop back to your box of objects
4. Use the cards to make a 2-digit number and count out that many items across into the empty container
5. Does it help to count in groups of 2, 5 or 10? Repeat until you have used all the cards.

### Challenge

How many journeys does it take to transfer exactly 100 items into the empty container?
